## SUMMARY

---

I am a Frontend Developer with skills in HTML, CSS, JavaScript, jQuery, Bootstrap, Tailwind CSS, and React JS. I build responsive and user-friendly websites that look great on all devices. I enjoy turning designs into real web pages and making sure everything works smoothly for users. I'm always learning and improving to stay up to date with the latest frontend technologies.

## SKILLS

---

Html, Css, Bootstrapa, Tailwind css, Javascript, React, jquery, C/C++, Oops, PHP, Mysql, Canva, Github, gitbash

## PROJECTS

---

### Spotify Clone

Built a basic front-end clone of Spotify with a custom music player, responsive layout, and interactive UI. Used JavaScript to control play/pause, song switching, and progress tracking. Developed a responsive and visually appealing front-end clone of the Spotify music streaming platform using core web technologies. Implemented essential features such as a music player interface, play/pause functionality, playlist structure, responsive navigation, and dynamic UI updates using JavaScript.

### Weather App

Built a responsive weather application that fetches and displays real-time weather data using the Open-WeatherMap API. Implemented key features such as city-based search, current temperature, weather conditions, and dynamic icons. Styled the UI with CSS to ensure a clean, mobile-friendly layout.

### Bubble Game

Bubble Game is basically random number generator in a particular box where the user click the given random number generated by the computer. If the user perform the high score in the game then win. this game used Html is for creating the structure, Css for styling and Javascript of logic.
